

FIRE RATED MICRO WOOD VENEER AND HOLLOW WOOD TUBES

by **Lenderink Technologies.**

Lenderink Technologies offers some of the finest micro-thin Veneers, with or without certified backers and pre-applied state-of-the-art adhesives and overlays.

Our veneers are engineered to fill the requests of designers, musicians and cabinet makers that demand accurate color and grain. The veneer is processed to meet today's standards for "Green", Certified, Thickness, Grade, Color, Repeatability, Buildup, etc. From the finest Micro-thin Veneers to Thick Core Veneer with or without certified backers and pre-applied State of the Art adhesives and overlays.

CLASS "A" RATED

For that special application that needs the extra protection **Lenderink Technologies** now offers its wood veneers with a Class A Fire rating. Fire Preventer also sold separately.

APPLICATIONS

Lenderink Technologies wood veneer is suitable for architectural applications but also for commercial applications including hospitality, retail, yacht, aircraft interiors, cabinets, and lighting.
