Europe's Luxury Metals Now Available in the USA

Europe's premier aluminum surfaces are officially launching in the USA! With an impressive thickness of only 0.1mm, this cutting-edge material offers unparalleled versatility across industries. The innovation and precision behind the technology used to create this product are unmatched in today's market. The potential applications for this material are as limitless as your imagination.

Available in six stunning colors, with custom color options also offered, this material features a state-of-the-art lacquer finish. It's not only stain-resistant but also highly resistant to scrubbing, UV damage, and fingerprints. This premium surface is perfect for a wide range of applications, including cabinetry, automotive design, aircraft interiors, retail furniture, casino spaces, restaurant settings, instruments, architectural panels, ceiling tiles, appliances, and more. The possibilities are truly endless.
