Always Advancing

New **LAMINATING** & embossing equipment, dry film, web & powder **adhesives**, **wood veneers**, backers, inner-plys, **fire-retardants**, overlays, **PROTOTYPING**, R&D, and supply chain.

GREENboard aka Popfoam

Rigid foam from 100% recycled plastic pop bottles for flat or strong 3D shapes. Molds and bonds easily. **Lightweight, quick installation, fast sawing, shaping, glueing, painting, and any finishing.** Forms into lightweight foam, building bricks and blocks.

Elkboard® Fiber Board

Composite Board offering compression molding for intricate 3D projects to serving as a versatile smooth and flat inner-ply or overlay. Fast cutting and assembly, prints and laminates. Replaces some metals and thick plywoods.

Expandable Epoxy Foam

Heat-activated expanding film adhesive structural material used to create foam core composites and fill voids. Fast, increases strength, and improves sound.

Metal Foils

Premier aluminum surface with an impressive .004" thickness that offers no tearing, fingerprint resistant, and unparalleled versatility across industries.

Always Your Resource for

Product Development

From development to finished product, we are dedicated to transforming innovative ideas into high-quality, fast, and practical solutions that meet the evolving market needs.

Prototyping

Lenderink Technologies and Associates provides comprehensive prototyping and 3D model services including machining, casting, and finishing, utilizing advanced technologies and materials to deliver high-quality, timely solutions across various industries right here in the USA. On-site lab equipment for quick turnaround.

Creative Thinking

Our 50+ years experience of creative thinking in manufacturing drives innovative concepts, transforming complex ideas into practical, high-quality advancements.

R & D

Our R&D efforts focus on pioneering new technologies and methods to drive innovation and advance industry standards. Experience covering many product disciplines.

Consulting

With over 50 years of experience solving manufacturing, materials, and design challenges, Lenderink is uniquely positioned to offer expert consulting services tailored to your needs.
