

Veneer Made "Green" and Renewable!

# Bend Me, Shape Me, Miter Me

(machine me, router me, laminate me, print me, finish me)

## You Can Be Sure It Will Be Right!

Engineered Core Veneer (ECV) 1/10"  
GREENboard 100% Recycled Pop Bottles  
Any Shape & Any Size

Our Engineered Core Veneer (ECV) can be pressed, laminated, printed, miter cut, machined, notched, diecut, lasered, and slotted to suit most any application!

Our Rigid Backer/Engineered Core Veneer is the future of environmentally green, high end veneer core. Expertly made of natural, long fibers. Designed for bentwood and flat/stable flat plywood, deco wall and floor, and 3D molded parts.

Miter folded, four corners with Lenderink Microwood Veneer overlay (shown below)

# Machines | Mitters | Slots | Punches

The innovative design professionals at Lenderink Technologies do amazing things with our composite panels.

- Lightweight densities like basswood or sweet gum
- Laser, water jet cut, punch, router, emboss, miter
- Smooth, tight edges, good screw hold, no cracking or splitting
- Color, density and edge is similar to basswood
- Available large sheet sizes to small cut-to-size pieces, no rough cut
- Clear, 1 piece, no void/no holes, square cuts
- Architectural grade for doors and panels
- **Eco-friendly**, certified **GREEN**, 20% recycled
- Machined, diecut, bent. UV printing available
- .025" to 7" thick
- Corona surfaces for easy bonding
- Polished faces for brilliant printing
- Moldable

*Exact quality - every piece!  
 Engineered density and screw hold  
 Excellent flat and dry internal bond,  
 M.O.E., M.O.R.*

*Perfect cuts every time!*
