European Luxury Metals
Colors & 3D Moldable

Flammability Certificate

Flammability of Anodized and PVD Coated Aluminum Coil or Sheet Form

According to the EN 13501-1 standard, the European Commission has included aluminum in the list of products which, under specific conditions, can be considered to be class A1 - no contribution to fire in any stage including the fully developed fire - without testing. This information is given in the Annex of the European Commission Decision 96/603/EC (OJ L 267 19.10.1966 p23) as amended by 2000/605/EC (OJ L 258 12.10.2000 p36) and 2003/424/EC (OJ L 144 12.6.2003 p9).

Lightweight and moldable - .004" thick.

Europe's Luxury Metals Now Available in the USA

Available in **six stunning colors**, with custom color options also offered, this material features a no-fingerprint finish. It's not only stain-resistant but also highly resistant to scrubbing, UV damage, and fingerprints. This premium surface is perfect for a wide range of applications, including cabinetry, automotive design, aircraft interiors, retail furniture, casino spaces, restaurant settings, instruments, architectural panels, ceiling tiles, appliances, and more. Primed back for easy gluing and laminating.

Europe's premier aluminum surfaces are officially launching in the USA! With an impressive thickness of only 0.1mm, this cutting-edge material offers unparalleled versatility across industries. The innovation and precision behind the technology used to create this product are unmatched in today's market. The potential applications for this material are as limitless as your imagination.
